

CALL FOR PROJECT APPLICATIONS

Pathology Research Awards

NATIONAL HEALTH LABORATORY SERVICE RESEARCH TRUST GRANTS

MISSION:

To develop/build/enhance research capacity in medical pathology by providing research grant support to

- young and new staff members who are at the beginning of their research careers to enable them to (with time) become independent generators of knowledge in medical pathology.
- experienced / established academic medical pathology staff / researchers to undertake high quality research that has the potential to impact positively on knowledge and practice in (medical) pathology.

Pathology Research Awards:

The NHLSRT invites project applications for three year research grants
with a maximum value of R500 000 for the duration of the project
to be submitted by 28th February 2008

This grant category caters for established and experienced researchers in pathology to enable them to undertake competitive and significant research that will advance knowledge and improve practice in their field of specialisation

Applications may be submitted in the following areas:

Anatomical pathology
Chemical pathology
Haematology
Microbiology: Bacteriology/Immunology/Mycology/Parasitology/Virology
Oral pathology
Human genetics – only if the department is within a School of Pathology

For full criteria and requirements concerning eligibility and process visit NHLS web site: http://www.nhls.ac.za/aca_nhls.html

Please download the specific proposal form for this grant category together with the application guidelines.

The Medical Research Council of South Africa has been appointed as the official service provider for the administration and management of NHLSRT grant applications

Contacts:

Research Administration Division: Tel No: (021) 938 0227 / 938 0217

E-mail: marina.jenkins@mrc.ac.za or belinda.chamberlain@mrc.ac.za

Pathology Research Development Grants

NATIONAL HEALTH LABORATORY SERVICE RESEARCH TRUST GRANTS

MISSION:

To develop/build/enhance research capacity in medical pathology by providing research grant support to

- young and new staff members who are at the beginning of their research careers to enable them to (with time) become independent generators of knowledge in medical pathology.
- experienced / established academic medical pathology staff / researchers to undertake high quality research that has the potential to impact positively on knowledge and practice in (medical) pathology.

Pathology Research Development Grants:

The NHLSRT invites project applications for one year research grants

up to R90 000 operational expenditure

to be submitted by 28th February 2008

This grant category caters for inexperienced researchers/staff and is meant to get them involved in research in order to improve their research skills and knowledge levels or to complete research projects required for higher degrees with a research component.

Applications may be submitted in the following areas:

Anatomical pathology
Chemical pathology
Haematology
Microbiology: Bacteriology/Immunology/Mycology/Parasitology/Virology
Oral pathology
Human genetics – only if the department is within a School of Pathology

For full criteria and requirements concerning eligibility and process visit NHLS web site: http://www.nhls.ac.za/aca_nhls.html
